SALT LAKE CITY, UTAH

JULY 17, 1909

## The First Perfect Feeding Device for Cream Separators.

We have frequently referred to the recklessly untrue statements and claims made by "desperate would-be-competitors" struggling to retain Cream Separator business that is going to the **United States Separator**.

We have repeatedly proved by the records of the United States Patent Office at Washington and by the records in the United States Circuit Courts, also by the records of International Expositions and National Expositions, that most of the claims of these would-be-competitors are false.

They are using desperate and false claims in their efforts to make it appear that they are first in everything desirable in Cream Separators.

The **United States Separator** was the first to employ a feeding device in the Separator bowl to deliver the whole milk beyond the cream zone. This device of the United States prevents all conflict of currents and any remixing of the cream and skim milk in the process of separation. It is far superior to any "split wing" device, more perfect in operation and has won the International prize for the most perfect separation.

The "disc" Separator could not use this device and in its efforts to equal the device of the United States was compelled to resort to an inferior expedient—the "split wing". But the "split wing" does not enable them to equal the United States, as the records show.

The **United States Separator** was the first to distribute the incoming volume of whole milk back of the cream wall.

The **United States Separator** was the first to use nonaligned channels for the currents of the milk through the Separator bowl, on which it holds strong patents, and no others can use this construction and it was the **United States Separator** that beat the "disc" Separator at the greatest International contest of Cream Separators ever held.

THE "DISC" SEPARATOR HAS NEVER BEEN ABLE TO EQUAL THIS TEST.

It was the **UNITED STATES SEPARATOR** that beat the "disc" Separator in its own County Fair test and recovered more butter in the cream than the "disc" Separator recovered.

The **UNITED STATES SEPARATOR** is manufactured under patents owned by IT.

The **UNITED STATES SEPARATOR** is the originator of the best things in Separator Improvements.

The **UNITED STATES SEPARATOR** is not an imitator in any particular.
